Pioneer Solutions Enhances EmissionsTracker for Full-Scale EMIS Support

Improved Management of Emissions and Water Quality Data

DENVER, May 4, 2010 – Pioneer Solutions, LLC, a regulatory compliance and risk management software provider, has enhanced its EmissionsTracker solution for more efficient use as a full-scale Environmental Management Information System (EMIS).

EmissionsTracker has long been providing companies with front, middle and back office capability and a comprehensive solution for automating end-to-end emissions tracking and management processes. Now, enhancements make it easier for organizations to handle even more environmentally related data within one integrated, user-friendly system.

“It’s no longer simply about having emissions and water quality data somewhere in-house,” said Mason Caperton, environmental and regulatory expert for Pioneer Solutions. “It’s about managing all of the systematic processes and risks related to the data. That’s what companies need, so that’s what we’re providing.”

Based on customers’ feedback, the most recent regulatory and compliance update includes more robust management of emissions and water quality data and processes. Additionally, the update provides a streamlined approach for compliance with the EPA Mandatory GHG Reporting Rule. These enhancements allow users to more efficiently manage all permits, documents, data, limits, tasks and required actions related to environmental compliance while gathering data from multiple data sources.

EmissionsTracker is one of the most robust EMIS solutions available. For more information on Pioneer Solutions, call 303-758-3780.

About Pioneer Solutions LLC

Pioneer Solutions is a leading provider of software products, powered by the Financial and Regulatory Risk Management System (FARRMS). FARRMS is an integrated platform providing straight through processing for specific front office, middle office, and back office functions. The FARRMS solutions allow organizations to realize new efficiencies as data and

processes are managed across multiple groups. In addition to the FARRMS software products, Pioneer Solutions provides consulting, implementation and environmental reporting services. Visit at www.PioneerSolutionsGlobal.com for more information.
