Pioneer Solutions ETRM Platform Enhances Physical Gas Management and Gas Scheduling Capabilities

A Comprehensive ETRM Software Solution for All Physical Gas Needs

DENVER, June 08, 2010 – Pioneer Solutions LLC, a regulatory compliance and risk management software provider, announced improvements to its energy-trading and risk management (ETRM) software platform. TRMTracker enhancements include robust physical natural gas scheduling and gas management functionality from the wellhead to the burner tip.

TRMTracker is a cost-effective (hosted or server-based), end-to-end energy multi-commodity trading and risk management software platform that supports the entire trade lifecycle from front office to back office. The enhanced physical gas management and scheduling module of TRMTracker provides trading organizations a complete and comprehensive software solution for all physical gas needs. Enhanced features include an easily configurable gas contract management template designed to manage complex contracts, including producer division of interest and structured deals, gas gathering, processing and storage contracts.

TRMTracker's pipeline scheduling functionality has been enhanced to include from-the-wellhead-to-the-burner-tip scheduling capability with automated web-based confirmations, dynamic workflow, pool balancing management and the ability to clone repeat schedules. Other features include a comprehensive "what if" physicals scenario analysis tool that can project a P&L outcome for a proposed deal; the best case can then easily be accepted and processed straight through to the back office.

"The enhanced natural gas physicals management capability of TRMTracker exemplifies Pioneer Solutions' commitment to providing its customers a truly comprehensive multi-commodity, physical and financial ETRM solution," said Uday Baral, principal of Pioneer Solutions.

About Pioneer Solutions LLC

Pioneer Solutions is a leading provider of software products, powered by the Financial and Regulatory Risk Management System (FARRMS). FARRMS is an integrated platform providing straight-through processing for specific front-office, middle-office, and back-office functions. Our leading edge, formula and template-driven technology (no coding) can easily adapt to unique business requirements and easily interface with other applications. The FARRMS solutions allow organizations to realize new efficiencies as data and processes are managed across multiple groups. In addition to the FARRMS software product solutions, Pioneer provides consulting, implementation and environmental reporting services. Visit at www.PioneerSolutionsGlobal.com for more information.
